

# Runtime Application Self Protection: WhiteHat Sentinel-Prevoty Solution

## Identify Security Issues in your Applications

WhiteHat Sentinel is a software-as-a-service platform that enables your business to quickly deploy a scalable application vulnerability program across the entire software development lifecycle (SDLC). By combining our scalable application scanning solutions with the world's largest web security expert team, we identify where you are vulnerable with near zero false positives. WhiteHat Sentinel is incredibly easy to use – it requires no additional staff or software. No matter how much code, how many websites or how often they change, WhiteHat Sentinel can scale to meet any demand without slowing you down.

WhiteHat Sentinel Offers:

- Production-safe testing
- Continuous and concurrent assessments
- Verification of vulnerabilities by security experts
- Risk based management

## Fixing the Issues can be Challenging

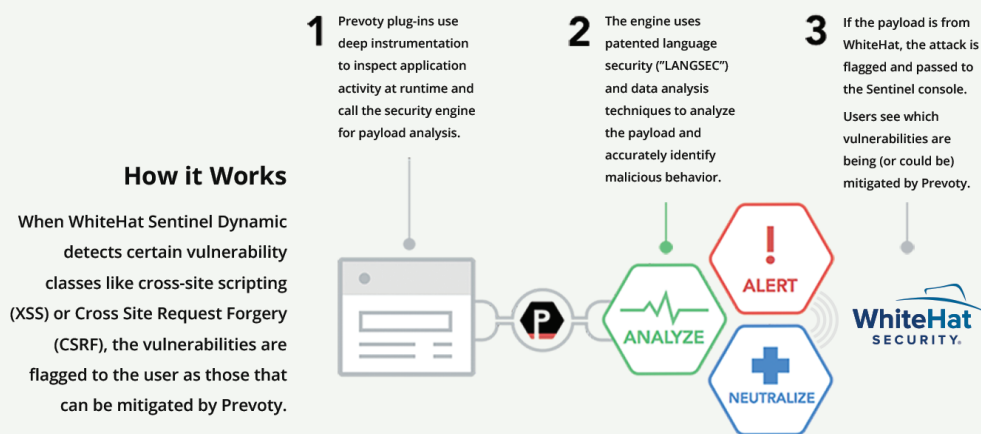

In today's agile business climate, speed of innovation and rapid development schedules leave the teams resource constrained. Often times, there are vulnerability backlogs from legacy applications, and it can be challenging to prioritize vulnerabilities for fixing. But with cyber attacks becoming more sophisticated and frequent, can you afford to leave your vulnerabilities exposed?

## Mitigate Application Vulnerabilities Automatically

A robust application security strategy involves accurate detection of vulnerabilities in your applications and real time monitoring to accurately identify and block the threats before they get exploited.

With WhiteHat Sentinel – Prevoty integration, you have the option of mitigating Sentinel detected vulnerabilities automatically by seamlessly integrating with Prevoty's Application Monitoring and Protection (AMP) solution. This WhiteHat Sentinel - Prevoty integration combines Prevoty's cutting edge Runtime Application Self Protection (RASP) technology, with WhiteHat's market proven Dynamic Application Security Testing (DAST) technology. RASP is an emerging security technology that allows applications to automatically defend against attacks without requiring changes to the application source code by automatic vulnerability mitigation.

## Dramatically Reduce Exposure to Vulnerabilities

## WhiteHat Sentinel – Prevoty Integration Benefits

The combination of WhiteHat Sentinel and Prevoty’s Application Monitoring and Protection solution provides significant benefits for enterprise application security programs.

Whether you are looking to jumpstart an application security program and have a long list of critical vulnerabilities to mitigate or need to prioritize a huge backlog of issues from legacy applications, the WhiteHat Sentinel – Prevoty integration will allow you to optimize your use of development resources, reduce risk through lowered exposure to vulnerabilities and lower the cost of remediation.

VISIBILITY INTO PRODUCTION ENVIRONMENTS	IMPROVED VULNERABILITY MANAGEMENT	INSTANT PROTECTION
<ul style="list-style-type: none"> <li>• See which applications are actually under attack (not just vulnerable)</li> <li>• Prioritize remediation efforts where they are needed most</li> </ul>	<ul style="list-style-type: none"> <li>• View both detected and mitigated vulnerabilities in the Sentinel interface</li> <li>• Get immediate insight into and protection against attacks</li> <li>• Optimize use of development resources</li> </ul>	<ul style="list-style-type: none"> <li>• Simultaneously detect and mitigate vulnerabilities, lowering exposure time</li> <li>• Allow time for development teams to remediate critical vulnerabilities</li> <li>• Reduce risk through lowered vulnerability exposure</li> <li>• Significantly reduce remediation effort for legacy applications</li> </ul>

### About WhiteHat Security

Founded in 2001 and headquartered in Santa Clara, California, WhiteHat Security is the leader in application security, enabling businesses to protect critical data, ensure compliance, and manage risk. WhiteHat is different because we approach application security through the eyes of the attacker. Through a combination of technology, more than a decade of intelligence metrics, and the judgment of real people, WhiteHat Security provides complete web security at a scale and accuracy unmatched in the industry. WhiteHat Sentinel, the company’s flagship product line, currently manages tens of thousands of websites – including sites in highly regulated industries, such as top e-commerce, financial services, and healthcare companies. For more information on WhiteHat Security, please visit [www.whitehatsec.com](http://www.whitehatsec.com).

### About Prevoty

Prevoty is dedicated to securing enterprises and the users they serve by monitoring and protecting the applications that are the heart of modern business. For more information on the company’s application security solutions, please visit [prevoty.com](http://prevoty.com) or follow [@prevoty](https://twitter.com/prevoty) on Twitter.
