

Case Study: ClearSlide

Challenges

- Motivated to invest in an application security solution for the following reasons:
 - For compliance
 - To reduce risk
-

Use Case

- WhiteHat Security solution is most relevant at the following phases of the Software Development Life Cycle (SDLC):
 - Quality assurance / User Acceptance Testing (UAT)
-

Results

- Found the following WhiteHat Security result to be the most valuable:
 - Minimize disruption to the software development lifecycle
 - Finds WhiteHat Security's 24/7 access to security experts in the Threat Research Center (TRC) to be not valuable for helping their security team and its remediation efforts.
 - Reduced their time to remediate vulnerabilities by up to 10% with WhiteHat Security.
