
Know your program risks, secure more applications in less time, with less in-house resources.

It can be challenging to develop and manage an application security program. Not only from a planning and a resource allocation perspective, but also because it is easy to get mired in day-to-day tactical operations and lose sight of the big picture strategy. Whether you are creating your first AppSec program or expanding rapidly and need some expert program management to move security left in your software development lifecycle, we can help.

WhiteHat Security is the leading advisor for application security with the most comprehensive platform powered by artificial and human intelligence. WhiteHat Sentinel, supported by WhiteHat Security Program Management, can help bridge the gap between your security and development teams, allowing them to deliver secure applications at the speed of digital business.

Benefits of the AppSec Performance Package

✓ Optimized web application security delivery
✓ Faster go-to-market timelines
✓ Increased visibility into the application
✓ Improved compliance
✓ Secure policy framework for web applications
✓ Reduced attack surface area
✓ Brand confidence

WhiteHat Security, an independent, wholly owned subsidiary of NTT Ltd., and a five-time leader in the Gartner Magic Quadrant for Application Security Testing, is empowering organizations to secure their digital futures in an app-driven world by continuously assessing the risk for software assets. We are the predominant intelligence-driven security partner, continuously supporting our customers’ digital transformation journey.

This Performance Package includes:

- NTT Software Security Assurance Assessment
- WhiteHat Sentinel Standard Edition (SE) testing for ten (10) web applications
- WhiteHat Program Management JumpStart service
NTT Software Security Assurance Assessment

A consultative advisory service that leverages extensive expertise, processes, and methodologies for assessing cyber risks of application security across different levels of the software development lifecycle.

The service provides:

✓ A baseline current state rating by qualitatively rating capabilities using a common 0-3 maturity scale
✓ Recommendations for future target capability maturity state
✓ Help for clients to align business drivers and risk to determine current and future states
✓ An actionable roadmap to help plan, guide, and show progress and direction over the course of improvement
✓ Utilizing the OWASP Software Assurance Maturity Model (SAMM), we help organizations formulate and implement a strategy for software security that is tailored to specific risks facing the organization

WhiteHat Sentinel SE

WhiteHat Sentinel Dynamic is an industry leading DAST solution offering best-in-class scanning and customer driven services. The AppSec Performance Package bundle includes testing for ten (10) web applications with form training, and authentication.

The service provides:

✓ Continuous Assessment
✓ Vulnerability Verification
✓ On Demand Retests
✓ Access to WhiteHat Security Engineers
✓ WhiteHat Security Index (WSI)
✓ Flexible Reports, Analytics and Peer Benchmarking
✓ Full Configuration and Form Training
✓ Authenticated Scanning

“Having information security professionals running point-in-time scans and attempting to advise developers on their code is a difficult proposition even when information security teams have coding expertise – which, in most cases, they don’t.”

- 451 Research - Pathfinder Report, 2019

Actionable Results

Our consultants seamlessly implement the agreed controls to ensure that any vulnerability exposed during the Assessment and Analysis phases is mitigated against in a structured and unobtrusive manner. The goal of the AppSec Performance Package is not only to address isolated issues, but to transform the underlying maturity of web application security.

The AppSec Performance Package delivers everything you need to assess your software risks, secure your apps, and optimize your resources – fast.
